

Balanced Growth and Income Portfolio

Fund Fact Sheet | 31 October 2019

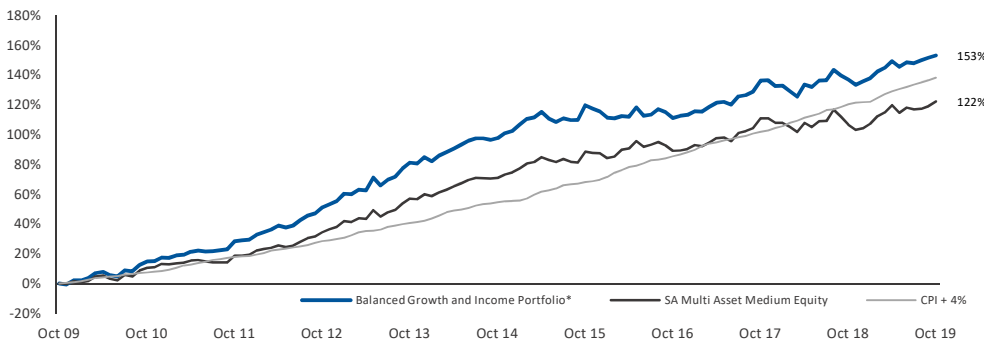

Manager Comments

In South Africa, the FTSE/JSE Capped All Share Index rose in line with most emerging markets on improved sentiment, with resources and financials leading the bourse while industrials lagged. The All Bond Index was marginally down on higher bond yields as the market reacted to the sobering Medium Term Budget Policy Statement and braced for Moody's month end credit rating review. The annual inflation rate for South Africa edged down to 4.1% in September 2019 from 4.3% in August, ahead of market expectations of 4.2% and the 4.5% mid-point of the Reserve Bank's target range of 3-6%. The Star Prime Balanced Fund was the biggest positive contributor to the portfolio's performance.

Investment Objective and Strategy

Deliver a return equal to or greater than CPI + 4% p.a. over rolling four year periods with a Standard Deviation of less than 8%. Over any rolling two year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager Fund and will ideally invest in at least two underlying funds but not more than six funds. Fund selection will be biased to funds with a high Sortino Ratio, low downside deviation and have been managed through significant negative equity market conditions. The Portfolio will invest in funds that allow the manager to make as many of the Asset Allocation decisions as possible. Manager selection will balance momentum and value management styles. This portfolio is Regulation 28 compliant.

Disclaimer

The Portfolio may be closed to new investments at any time in order to be managed in accordance with its mandate. Permissible deductions may include management fees, brokerage, STT, auditor's fees, bank charges and trustee fees. The portfolio only invests funds with managers regulated by the FSB. The portfolio is a long-term investment. Performance figures are produced by STAR Investment Partners (Pty) Ltd, supplied by independent service providers, and are for lump sum investments with income distributions reinvested. STAR Investment Partners (Pty) Ltd is an Authorised Financial Services Provider. The previous month's change in inflation is used as an estimate for the current month (since inflation numbers are released one month in arrears). *Returns are based on the strategic underlying weightings of the funds and will not exactly reflect individual client returns. All returns are net of fund management fees, but exclude advice and administration fees. Prior to portfolio launch date, the performance is pro-forma using the actual underlying fund performances and is net of all fees and expenses.
