## Global Manager Commentary

Global stock markets started the month on the back foot after military tensions between the US and Iran reached fever pitch. This abated somewhat and in addition a conciliatory tone in US-Sino relations took hold and the markets surged to new highs. The spread of the CoronaVirus caused considerable panic later in the month, sending stocks back below the month's opening levels ending the month at -1.3%. Global property performed well in January supported by the bounce in UK property assets following the signing of the withdrawal agreement with the EU. Global bonds outperformed; however, this was more a function of the dollar strength effect with the move to safe haven assets.

## Investment Objective & Strategy

Deliver a return equal to or greater than USD LIBOR + 2% over rolling five year periods. Over any rolling three year period the portfolio should always deliver a positive return. Portfolio returns will be generated through interest income, dividend income and capital growth. The portfolio benchmark is MSCI 30% Real Estate 10% JPM GBI 30% LIBOR 30%. The portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. Where possible underlying funds will be given as many of the underlying asset allocation decisions as possible.
