

# STAR Cautious Income & Growth

Return Date: 2021/04/30

South African Rand

## Local Manager Commentary

South African domiciled asset performances were a mixed bag in April, with the general risk on sentiment in global capital markets not translating fully to the SA domestic market. The bullish sentiment was very positive for the SA property market, which returned +11.7%, adding impressively to the YTD and 1 year recovery numbers. South African general equities struggled to capitalize on the strong performance of resource stocks, with the main detracting sector being the gold sector, which have been negatively affected by the drop in the Dollar price of gold as well as the 1.2% appreciation in the ZAR. SA bonds performed strongly over the month, reflecting a return to the attractive carry trade dynamics of SA government bonds.

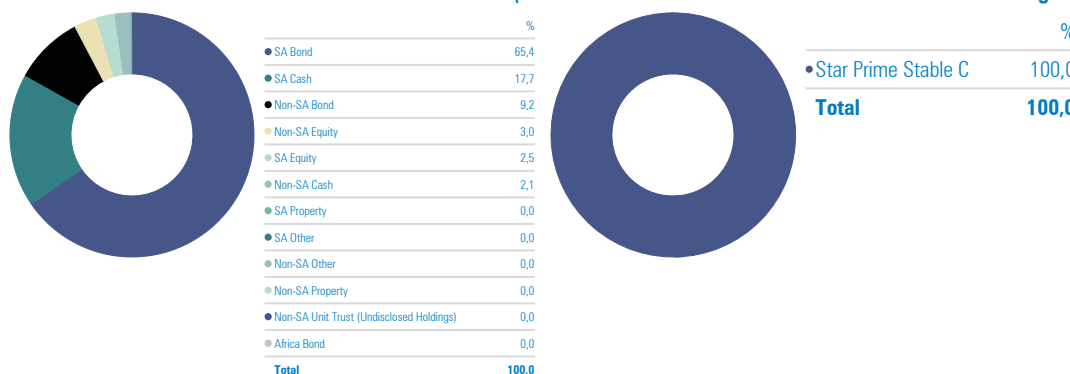

## Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 2% p.a. over rolling two year periods with a Standard Deviation of less than 4%. Over any rolling one year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance growth and value management styles. This portfolio is Regulation 28 compliant.
