

Target CPI + 6%

Return Date: 2021/06/30

South African Rand

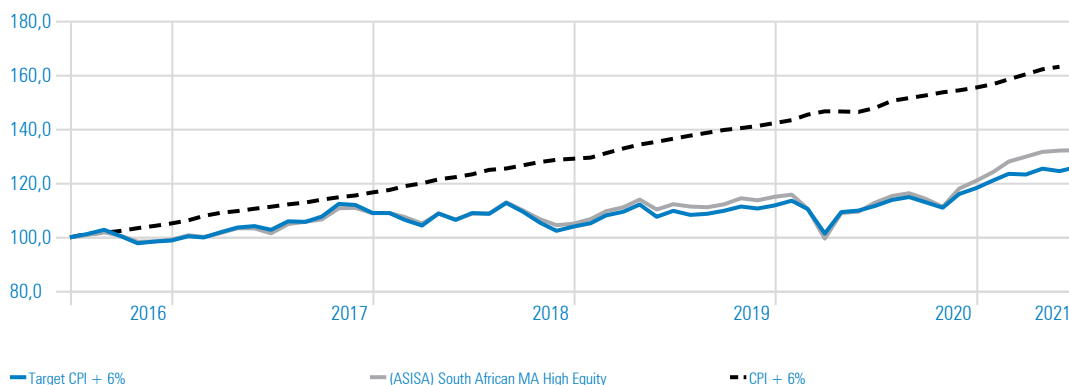

Local Manager Commentary

South African capital markets remained at the whim of global risk sentiment over June, with a bout of good news out of the country making little difference to monthly asset class returns. SA property indices continued their recovery after a long period of disappointing returns, gaining 3.4% in June. South African fixed income securities had a strong month as well, evident in the ALBI returning 1.1% over the month. The JSE All Share disappointed however, with lower resource prices, especially in the precious metals category, driving a pull back in overall performance, culminating in a June detraction of (2.4%).

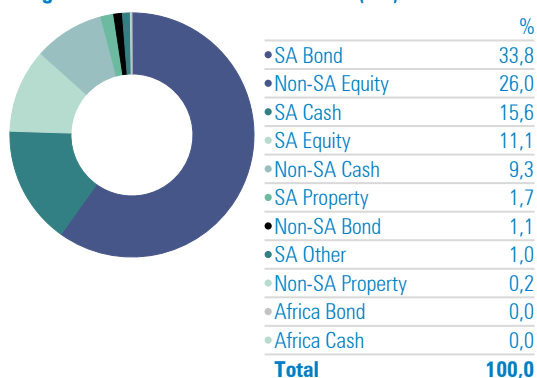

Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 6% p.a. over rolling five year periods while keeping the portfolio standard deviation as low as possible. Over any rolling three year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance momentum and value management styles. This portfolio is Regulation 28 compliant.
