Local Manager Commentary

Both the All Share and the All Bond index showed a stellar performance over July, indicating once again that local bad news items are taking a back seat to global risk appetite. The All Share had its best month so far in 2021, returning an impressive 4.2%, and the All Bond index returning a respectable 0.8% for July. Local property indices pulled back slightly from their recent gains, detracting (0.6%), notably the powerful recovery performance of the asset class earlier in the year has ensured that South African listed property has delivered the best asset class return YTD.

Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 6% p.a. over rolling five year periods while keeping the portfolio standard deviation as low as possible. Over any rolling three year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance momentum and value management styles. This portfolio is Regulation 28 compliant.
