

STAR Balanced Growth Asset Swap (ZAR)

Return Date: 2021/12/31

South African Rand

Global Manager Commentary

Property markets ended the month with the highest return, this continues the theme of skyrocketing property prices in developed markets. The monthly return of 6.9% pushed the global property asset class to the top of the 2021 calendar year return, as well with an annual return of 30.0%. The higher likelihood of increasing rates in major economies such as the US, UK, and Germany caused a scare in global bond markets. While increasing rates are beneficial to the forward return expectation of the fixed income asset class, the immediate effect is that of a capital loss on currently available bonds.

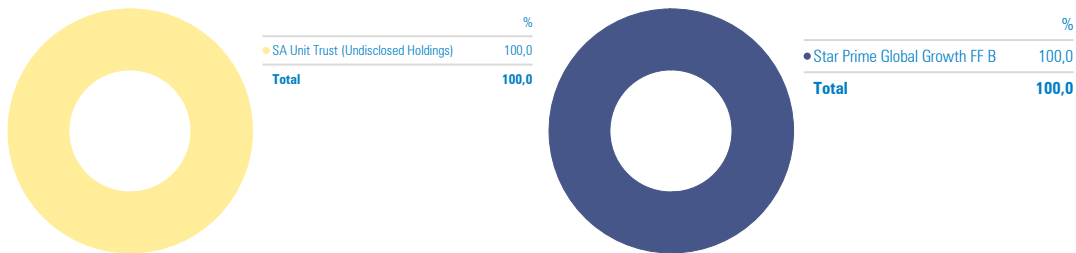

Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 6% p.a. over rolling five year periods while keeping the portfolio standard deviation below 12%. Over any rolling three year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance momentum and value management styles.
