

# STAR Balanced Growth Asset Swap (ZAR)

Return Date: 2022/01/31

South African Rand

## Global Manager Commentary

Developed market stocks had their worst start to a year since 2016 (MSCI ACWI -5.2%). This, as the prospect of tightening monetary conditions weighed on stocks, particularly growth stocks which recorded their biggest monthly underperformance relative to value stocks since 1999. The increasingly hawkish stance of the US Federal Reserve (Fed) coincided with the latest US inflation print coming in at a 40-year high (7%) and, by the end of January, markets were anticipating five US rate hikes of 0.25% each in 2022 (up from an expectation for three hikes in 2022 at the start of the year). Fed minutes also showed that members had started discussing the prospect of shrinking the Fed balance sheet once rate hikes had started. US 10-year government bonds climbed 0.3% to 1....

## Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 6% p.a. over rolling five year periods while keeping the portfolio standard deviation below 12%. Over any rolling three year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance momentum and value management styles.
