

STAR Cautious Income & Growth

Return Date: 2022/01/31

South African Rand

Local Manager Commentary

The local bourse had a good start to 2022 as it benefitted from improved sentiment towards emerging markets and a rally in commodity prices. Mining shares were amongst the best performers. The Peoples Bank of China (PBOC) has started loosening monetary policy in an attempt to boost flagging economic growth and the prospect of stronger economic growth in China helped boost commodity prices and drove the share prices of diversified miners. Geopolitical tensions surrounding the build-up of Russian troops on the border of Ukraine placed pressure on a tight global energy market, driving Brent crude oil and thermal coal prices higher. Sasol and Thungela were the biggest local beneficiaries of spiking energy prices.

Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 2% p.a. over rolling two year periods with a Standard Deviation of less than 4%. Over any rolling one year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance growth and value management styles. This portfolio is Regulation 28 compliant.
