

# Target CPI + 6%

Return Date: 2022/05/31

South African Rand

## Local Manager Commentary

The local stock market was slightly negative in May, following on from a volatile April, as it rallied alongside global markets in the last few days of the month with the FTSE/JSE All Share Index ending at (0.36% MoM). Both the industrial and resource sectors dragged down performance after losing (2.36%) and (0.32%) respectively, while financials were up amongst the best performers up 4.16% at the end of May.

## Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 6% p.a. over rolling five year periods while keeping the portfolio standard deviation as low as possible. Over any rolling three year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance momentum and value management styles. This portfolio is Regulation 28 compliant.

## Investment Growth

## Asset Allocation (SA) - Target CPI + 6%

## Portfolio Holdings - Target CPI + 6%

## Trailing Returns - Target CPI + 6%
