Local Manager Commentary

In March locally listed equities contracted due to the impact of the slowing local economy and global banking troubles. The FTSE JSE/ALSI ended the month down (1.26%), primarily due to the financial sector that registered a return of (6.42%). After 4 months of declines, South African inflation accelerated, with both headline and core CPI ending YoY higher at 7.0% and 5.2% respectively. The South African Reserve Bank caused a stir in the market by unexpectedly hiking the repo rate to 7.75%, an increase of 50 basis points. The Rand firmed up against the Dollar towards the end of March appreciating by 3.35% to end the month stronger at R17.74.

Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 2% p.a. over rolling two year periods with a Standard Deviation of less than 4%. Over any rolling one year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance growth and value management styles. This portfolio is Regulation 28 compliant.
