Local Manager Commentary

August was a risk-off month in financial markets as local equities ended the month lower, with the FTSE/JSE ALSI losing (4.77%), the biggest drop for the index in 2023. Local inflation slowed further for a fourth consecutive month to the lowest level since July 2021 at a 4.7% YoY increase, down from 5.4% the previous month, bringing inflation close to the midpoint of the SARB's inflation target range of 3% to 6%. Weaker than expected domestic data and a resurgence in the Dollar caused the Rand to depreciate (6.17%) against the greenback to end the month at R18,90/\$.

Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 2% p.a. over rolling two year periods with a Standard Deviation of less than 4%. Over any rolling one year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance growth and value management styles. This portfolio is Regulation 28 compliant.
