## Local Manager Commentary

With continued selling pressure across the market, local equities ended the month lower with the FTSE/JSE ALSI losing (2.55%). Industrials and Financials were the biggest drags on the index, losing (4.12%) and (3.83%) respectively. The latest CPI report showed that both headline and core inflation accelerated again, both coming in at 4.8%, up from 4.7% the previous month. The Monetary Policy Committee kept South Africa's key interest rate steady at 8.25% for a second consecutive meeting. Local bonds also came under pressure in September as was the case with equities, with the ALBI losing (2.34%), bringing the YTD returns for the Index down to just 1.47%.

## Investment Objective & Strategy

Deliver a return equal to or greater than CPI + 2% p.a. over rolling two year periods with a Standard Deviation of less than 4%. Over any rolling one year period the portfolio should always deliver a positive return. The Portfolio is a Multi-Manager solution and will comprise at least two underlying funds and ideally a maximum of six underlying funds. Fund selection will be biased towards funds that have high Sortino Ratios, low downside expectations and have been managed through significant negative equity market conditions. The portfolio will invest in funds that allow the manager to make as many of the asset allocation decisions as possible. Manager selection will balance growth and value management styles. This portfolio is Regulation 28 compliant.
